Claim Objections

1. Claim 4 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim 1. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 1 recites a light shielding layer formed on the second substrate except regions corresponding to an active region (i.e., pixel electrodes and TFT components). However, claim 4 recites the light shielding layer comprising a matrix arrangement in the active region

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kashimoto (US 5844645).

Kashimoto discloses and shows (Figure 4) an active matrix liquid crystal display (LCD) panel comprising :

first and second substrates (11, 21);

an active region includes pixel electrodes 13 and TFT (not shown) components such as source lines 12 disposed on the first substrate 11;

Art Unit: 2871

a sealing region includes sealing element 40 formed outside the active region and along a corresponding region of the second substrate, the sealing element attaching the first substrate to the second substrate and (inherently) maintaining a gap therebetween (see Figure 4);

a light shielding layer 26 formed on the second substrate 21, except regions corresponding to the active and sealing regions;

a liquid crystal layer 50 formed between the substrates and in the active region.

21, 11; an active region includes pixel electrodes 13 and TFT (not shown) components such as source lines 12 disposed on the substrate 11 (Applicant's first substrate); a sealing region includes sealing element 40 formed outside the active region; a light shielding layer 26 formed on the substrate 21, outside the active region and absent in the sealing region.

Claim Rejections - 35 USC § 103

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kashimoto (US 5844645) as applied to claims 1, 3 above.

The limitation not explicitly disclosed by Kashimoto is UV-type hardening sealant.

The use of UV-type hardening material for the sealing element is very common and well known in the liquid crystal display art. Therefore, it would have been obvious to one of ordinary skill in the art to employ UV-type hardening material for the sealing element since it is a very common and well known in the liquid crystal display art

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Response to Arguments

6. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
